Yaem QR (SaaS platform for HoReCa automation)

Karaganda, online-menu.org

Hotels, Restaurants, Food Service Industry, Catering

- Catering (Outside Food Services)
- Restaurant, Food Service Industry, Fast Food
- Hotel

IT, System Integration, Internet

- Software Development

Технический директор (СТО)

- End-to-End Development: Designed and implemented the product architecture from scratch (from the database to the frontend), building a scalable SaaS system serving 500,000+ unique visitors.

- HoReCa Automation: Implemented complex integration with cash register systems (iiko, POS systems), automating the order-payment-kitchen cycle, allowing establishments to reduce service time by 30%.

- Payment Infrastructure: Integrated local and international payment gateways (Wooppay, Freedom Pay), ensuring transaction resiliency and financial data security.

- High Availability: Containerized the system (Docker) and configured CI/CD processes (GitHub Actions), achieving fully automated deployment and stable service operation without manual intervention from technical support.

- Development Efficiency: As the sole architect and key developer, I optimized the frontend development process using AI tools, enabling the rollout of new modules (menus, loyalty, analytics) twice as fast as market standards.

- Result: Built a fully autonomous product that successfully operates in production and scales to new locations without performance degradation.

YAEM-TIPS (Cashless Tipping Service)

Karaganda, online-tips.org/

Hotels, Restaurants, Food Service Industry, Catering

- Restaurant, Food Service Industry, Fast Food
- Hotel

Технический директор (СТО)

- Fintech Architecture: Designed and implemented a microtransaction service, ensuring a secure "client-acquiring-employee account" chain.
- Transaction Logic: Developed a funds distribution and withdrawal system, integrating local payment gateways (Freedom Pay, Woopay) while complying with financial transaction security requirements.
- Mobile-First UX: Created a lightweight and fast payment interface (React/JS), optimized for QR code transactions, which increased conversion rates.
- Real-time Notifications: Implemented a system for informing staff about tip receipts via the Telegram Bot API, ensuring transparency and user engagement.

apps.kz (Software Development Agency)

Almaty, apps.kz/

IT, System Integration, Internet

- Software Development

Fullstack-разработчик

- Worked on technical implementation and designed architecture for key agency projects, ensuring rapid product launches.

Key Projects:

- TheGame by Dmitry Kazantsev (Fintech/EdTech):
- Worked on a gaming platform for investment education (stocks, crypto assets).
- Implemented the architecture, which supported over 1,000,000 sessions and an active user base of 50,000.
- Implemented complex financial algorithms and real-time data updates.
- AiIFit (HealthTech & AI):
- Worked on a platform for women's sports marathons with an audience of over 30,000 users.
- Integrated AI solutions to personalize training and nutrition plans.
- Implemented a seamless experience through Telegram Web Apps (TWA), significantly increasing user retention.
- AI-Native Products (Automation & Services):
- AI Task Tracker: Developed a task management system based on LLM that automates resource prioritization and allocation.
- AI Notary Maps: Created a mapping service for notary services using AI for intelligent search and data verification.

About me

- Backend developer specializing in designing fault-tolerant systems, automating complex business processes, and integrating external services (Fintech, POS, AI, messaging).
- My primary focus is backend development, but I also have practical experience in frontend (JavaScript/TypeScript), which allows me to develop and launch turnkey products. I actively use AI-assisted approaches to accelerate development and optimize solutions.
- I have experience integrating with payment systems (Freedom Pay, Wooppay), POS systems (IIKO), and automating interactions with messaging apps (Telegram API, WhatsApp API).
- I am the author and architect of my own services, focused on autonomy and scalability.
- Candidate Master of Sports in rowing.
- I am interested in complex engineering problems and systems design.
