More about me: <https://artemchik16.github.io/>

Reside in: Karaganda

Citizenship: Kazakhstan, work permit at: Kazakhstan

Ready to relocate: Kazakhstan, Russia, ready for rare business trips

Desired position and salary

Software Engineer/Full-stack Developer

1 000 \$ in hand

Specializations:

— Programmer, developer

Employment type: full time, part time, project work/one-time assignment

Work format: remote, hybrid

Desired travel time to work: any

Work experience — 3 years 8 months

August 2022 —
March 2026
3 years 8 months

YAEM QR · Technical Co-Founder & CTO (SaaS platform for FoodTech automation)

Технический директор (CTO)

Built a SaaS digital menu platform for HoReCa from zero to production as the sole technical decision-maker in a 3-person founding team (business + tech split).

- Designed full system architecture: multi-tenant Django/DRF backend, PostgreSQL schema, Redis caching layer, async task processing via Celery
- Integrated iiko POS systems to automate the order → payment → kitchen cycle, cutting service time by 30%
- Integrated Freedom Pay and Woopay payment gateways with transaction resilience and financial data security
- Set up Docker containerization and GitHub Actions CI/CD — zero-downtime deployments, no manual intervention
- Scaled to 1m+ unique visitors without infrastructure degradation

Stack: Python · Django · DRF · PostgreSQL · Redis · Celery · React · Docker · GitHub Actions

August 2025 —
February 2026
7 months

YAEM TIPS · Technical Co-Founder & CTO (Cashless Tipping FinTech Service)

Технический директор (CTO)

Designed and built a cashless tipping fintech service from scratch within the same founding team.

- Architected a secure microtransaction flow: client → acquiring → employee account
- Built funds distribution and withdrawal logic with Freedom Pay / Woopay compliance
- Developed a mobile-first React/JS payment interface optimized for QR transactions
- Implemented real-time tip notifications for staff via Telegram Bot API

Stack: Python · Django · DRF · PostgreSQL · React · Telegram Bot API

April 2024 — July 2025
1 year 4 months

ZantechKZ (LegalTech Marketplace)

Middle Backend Developer / Architect

Worked as a fullstack developer on a LegalTech marketplace connecting clients with lawyers in Kazakhstan.

- Designed and implemented core platform architecture: client-lawyer matching, communication layer, profile and search systems
- Built backend API and database schema, handled third-party service integrations
- Developed frontend components (React/JS) alongside backend
- Built a Telegram bot with AI-powered contract analysis — automated document review for legal clients

Stack: Python · Django · DRF · PostgreSQL · React · Telegram Bot API · Docker · LLM integration

June 2023 — May 2024
1 year

APPS.KZ · Fullstack Developer

Almaty, apps.kz

IT, System Integration, Internet

- Software Development

Fullstack-разработчик

Worked as a fullstack developer at a software agency, contributing to architecture and implementation across multiple product verticals.

TheGame (Fintech/EdTech) - investment education gaming platform

- Contributed to backend architecture supporting 1,000,000+ sessions and 50,000 active users
- Implemented real-time data updates and complex financial calculation logic

AieFit (HealthTech/AI) - women's fitness marathon platform, 30,000+ users

- Built Telegram Web App (TWA) integration, significantly improving user retention
- Integrated AI-based personalization for training and nutrition plans

AI Automation tools - internal LLM-based products

- Built Telegram bots for business process automation across multiple client projects
- AI Task Tracker: Developed a task management system based on LLM that automates resource prioritization and allocation.
- Personal Matrix Generator: Built a calculation service generating personalized life-path charts based on date of birth — custom algorithm engine, automated report generation, web interface.

Stack: Python · Django · · PostgreSQL · MySQL · Telegram Bot API · AI/LLM integrations

About me

Backend Software Engineer with 3+ years in production. I own problems end-to-end - from architecture decisions to deployment. Comfortable working without hand-holding, used to being the only engineer in the room.

Core stack: Python · Django/DRF · PostgreSQL · Redis · Celery · React · Docker

Open to remote backend or fullstack roles.
